RFCongress has now been in session four months, yet rotting less been dance-Week abor week rol's by, yet things remain the same; speech after speech is sion will be prolonged into August, and my attention was called in the time of my when the weather becomes insufferably hot, it siekoess drives them from Washington, the members will arouse to a sense of duty, and in the course of a few days, or weeks, at best, perform what they ought to have done months, before. The great misfortune is that the Constitution does not require Congress to adjour a on the Fourth of March, of each year. If this was the east, there would be expedition in all matters of business, the public injerest would not severely suffer, as it now does and the public Treasury would not he as outrageously robbed, as it now is ---The two Houses meet at 12 and adjourn at 3; so that out of the usual working or business hours, these gentlemen who are paid eight dollars per day for their services, only work about three hours. They might always be in session six hours, and then have ample time to attend to business before the Committees, at the Departments. write their letters, &c. But this would nut be fashionable, and hence the idea cannot be entertained for a moment. Until there is a radical refermation in Congressimal proceedings, we cannot hope for a better state of public affairs.

HF Godey's Lady's Book for April is on our desk. Its i lestrations are "Suilles and Tears," " Sing Me that sweet air again," " The Suprise Party," together with Music, Fashious, Model Consecs, Patterns of needle work, &c. This is decidedly a Lady's work, and every possible effort is made to formish it with such matter as shall be useful and acceptable to the Ladies. Godey spares no pains or expense to keep his Magazine in the front tank of the periodicals of the day; and the fact that he has over furty thousand subscribers, allows must conclusively that his efforts are well appreciated. The contributers to the presnumber are Arthur, Simus, Mrs. Ellet, Mrs. Hale, and many others who are favorites with the public. The next Number, for May, will contain an excellent likeness of Mrs. Hale, the accomplished olitor, and a lady who has done very much for her sex, by the admirable pruductions of her-pen-

We have frequently recommended the lady's Book to the patricage of the publie; again we say, especially to the Ladies, if you desire a valuable companion, wellstored with interesting and useful matter, by all means subscribe for Godey's Lody's Book. Enclose three dollars to L. A. This medicine has proved to be most valuable in the following diseases; Chronic bulletonen, Jambier, Weskhers of the digestive Organs, Dyspeysia or Indigestion and Sourness of the stonach, Rheumatism and Sal Rheon, Pemeinad disorder of the Liver, Chronic Empirons of the Skin, and all Secondulous Diseases. Also it is found to be an invaluable remedy for the Eryspekas, and that distressing disorder, the Asthma. It has proved loughly beneficial in some cases of Dropsy, Dysentery, Districts.

It will be found by observation that many of the above disorders, and also that faul disease Phritis Pulmonaths, or Consumption, generally originate in a serofulous state of the system; and to cure such diseases, we must remove the primary causa. It will likewise he found that diseases of the Liver often originate with passons of a serafulces habit, and are colled liver complaints; but it is a well established fact that believe such liver complaints on the permanently cured this serofulous diathesis must be removed.

curred this serofulous diathesis must be removed.

That this is the effect of this Syrup, hundreds of the most conquetent judges, who have seen and left the vitine of the carative power can bear witness. It is a laxative, discretificate, and greatly alterative, and is prepared from the best and most virtuous alteratives of the vegetable long dam, without the addition of any mineral substance whenever. It is a perfectly safe modicine, and may be taken at any time without regard to weather or excise.
